### Air-Cooled Generator Sets

Model 5621

### Auxiliary Transfer Switch Contact Kit

#### DESCRIPTION

The auxiliary transfer switch contact kit allows a single large electrical load to be locked out from generator operation. If a home is equipped with electrical heat or multiple central air conditioning units, this device allows the generator transfer switch to interrupt the control wire, breaking the signal needed for the appliance to turn on.

#### INSTALLATION INFORMATION

- Once installed, the control wire must be run from the appliance to the transfer switch to connect to the contact.

Model 5666

### Fascia Base Wrap Kit

#### DESCRIPTION

The fascia base wrap snaps together around the bottom the new air cooled generators. This offers a sleek, contoured appearance as well as offering protection from rodents and insects by covering the lifting holes located in the base.

Please note that this wrap only fits air-cooled generators manufactured after 4/2008 that have the contoured body wrap style and are only available in grey.

### Base Plug Kits

#### DESCRIPTION:

The base plug kit offers an easy way to fill the lifting holes present in the base of the generators. In the air-cooled product this offers rodent and insect protection which could potentially be an issue during service intervals. In liquid cooled product, it completes the look of a finished base for a sleek, streamlined appearance.

Please note that the base plug kit (5652) for the air-cooled product only fits air-cooled units manufactured prior to 4/2008 that do not have the contoured body wrap style.

### Paint Kits

#### DESCRIPTION:

The enclosure is the generator's first line of defense against the elements and is important to keep in good condition. If the generator enclosure is scratched or damaged, it is important to touch up the paint to protect from future corrosion. These paint kits include the necessary paint to properly maintain or touch up a generator enclosure.

Please check with your sales representative to verify proper color coordination.

5653	Tan Kit – Generators manufactured prior to 4/2008 without contoured body style.
