

90% Fuel Level Alarm

GENERAC® PROTECTOR DIESEL GENERATOR ACCESSORIES

Model 006504-0

DESCRIPTION

The alarm panel alerts the fuel fill operator when the tank reaches a 90% fill level by sounding an audible alarm and triggering an LED warning light. The panel mounts within the fuel fill and vent area of the generator enclosure and is housed in a NEMA 3R powder painted, steel enclosure. All mounting hardware and connection wire is included.
