INCLUDES:
• G-Flex™ Variable Speed Technology
• Designed specifically for use with alternative energy and storage solutions
• Two Line LCD Multilingual Digital Evolution™ Controller (English/Spanish French/Portuguese)
• Electronic Governor
• System Status & Maintenance Interval LED Indicators
• Sound Attenuated Enclosure
• Flexible Fuel Line Connector
• Direct-To-Dirt Composite Pad
• Protective Base Fascia
• Natural Gas or LP Gas Operation
• 3 Year, 2000 Hour Limited Warranty
• Capability to be installed within 18" (457 mm) of a building*

FEATURES
• INNOVATIVE DESIGN & PROTOTYPE TESTING are key components of GENERAC’s success in “IMPROVING POWER BY DESIGN.” But it doesn’t stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, plus testing to applicable CSA, NEMA, EGSA, and other standards, allows you to choose GENERAC POWER SYSTEMS with the confidence that these systems will provide superior performance.

• G-FLEX VARIABLE SPEED TECHNOLOGY. By utilizing patented variable speed technology, the generator is capable of running at various RPMs depending on the electrical demand, resulting in quieter operation, better fuel economy and produce power at <2% total harmonic distortion for quality power.

• EXTENDED RUN CAPABILITY. This innovative oil circulation system extends the maintenance intervals by an unprecedented 5 times the industry standard by offering 500 hour maintenance intervals.

• TEST CRITERIA:
  ✓ PROTOTYPE TESTED
  ✓ SYSTEM TORSIONAL TESTED
  ✓ NEMA MG1-22 EVALUATION
  ✓ MOTOR STARTING ABILITY

• SOLID-STATE, FREQUENCY COMPENSATED VOLTAGE REGULATION. This state-of-the-art power maximizing regulation system is standard on all GENERAC models. It provides optimized FAST RESPONSE to changing load conditions and MAXIMUM MOTOR STARTING CAPABILITY by electronically torque-matching the surge loads to the engine. Digital voltage regulation at ±1%.

• SINGLE SOURCE SERVICE RESPONSE from GENERAC’s extensive dealer network provides parts and service know-how for the entire unit, from the engine to the smallest electronic component.

• PURPOSE BUILT FOR RENEWABLE ENERGY APPLICATIONS. Designed specifically to interact with off-grid renewable energy applications, GENERAC introduces the first generator intended for alternative energy interaction. Capable of tying into an inverter and battery storage system to supplement the alternative energy source. This provides the cleanest running, low emission solution to recharging house batteries.
# Features and Benefits

## Engine
- **Generac (OHVI) design**
  - Maximizes engine “breathing” for increased fuel efficiency. Plateau honed cylinder walls and plasma moly rings help the engine run cooler, reducing oil consumption resulting in longer engine life.
- **“Spiny-lok” cast iron cylinder walls**
  - Rigid construction and added durability provide long engine life.
- **Electronic ignition/spark advance**
  - These features combine to assure smooth, quick starting every time.
- **Oil circulatory system**
  - Extends maintenance intervals to 500 hours and virtually eliminates oil degradation.
- **Full pressure lubrication system**
  - Pressurized lubrication to all vital bearings means better performance, less maintenance and longer engine life. Now featuring up to a 2 year/500 hour oil change interval.
- **Low oil pressure shutdown system**
  - Shutdown protection prevents catastrophic engine damage due to low oil.
- **High temperature shutdown**
  - Prevents damage due to overheating.
- **Optimized muffler and resonator**
  - Results in dramatically quieter operation during normal loads than constant speed systems.

## Generator
- **Cylindrically wound rotor**
  - Allows for multi-phase excitation, enabling variable engine RPM resulting in fuel savings and sound reduction.
- **Skewed stator**
  - Produces a smooth output waveform for compatibility with electronic equipment.
- **Variable speed, constant frequency AVR**
  - Provides uncommonly clean power with less than 2% THD (Total Harmonic Distortion)
- **Automatic voltage regulation**
  - Regulates the output voltage to ±1% prevents damaging voltage spikes.
- **UL 2200 listed**
  - For your safety.

## Evolution™ Controls
- **Auto/Manual/Off illuminated buttons**
  - Selects the operating mode and provides easy, at-a-glance status indication in any condition.
- **Sealed, raised buttons**
  - Smooth, weather-resistant user interface for programming and operations.
- **2-wire Start Interconnection**
  - Allows the generator to be started by a two wire signal.
- **Smart battery charger**
  - Delivers charge to the battery only when needed at varying rates depending on outdoor air temperature. Compatible with both lead acid and AGM-style batteries.
- **Main line circuit breaker**
  - Protects generator from overload.
- **Electronic governor**
  - Maintains constant 60 Hz frequency.

## Unit
- **SAE weather protective enclosure**
  - Sound attenuated enclosures ensure quiet operation and protection against mother nature, withstanding winds up to 150 mph. Hinged key locking roof panel for security. Lift-out front for easy access to all routine maintenance items. Electrostatically applied textured epoxy paint for added durability.
- **Enclosed critical grade muffler**
  - Quiet, critical grade muffler is mounted inside the unit to prevent injuries.
- **Small, compact, attractive**
  - Makes for an easy, eye appealing installation, as close as 18” away from a building.

## Installation System
- **1 ft (305 mm) flexible fuel line connector**
  - Absorbs any generator vibration when connected to rigid pipe.
- **Direct-to-dirt composite pad**
  - Complex lattice design prevents settling or sinking of the generator system.
- **Integral sediment trap**
  - Prevents particles and moisture from entering the fuel regulator and engine, prolonging engine life.

**Fuel pipe must be sized for full load.**

Required fuel pressure to generator fuel inlet at all load ranges: 3.5-7" water column (7-13 mm mercury) for natural gas, 10-12" water column (19-22 mm mercury) for LP gas. For Btu content, multiply ft³/hr x 2500 (LP) or ft³/hr x 1000 (NG). For Megajoule content, multiply m³/hr x 93.15 (LP) or m³/hr x 37.26 (NG).

### Controls

- **2-Line Plain Text Multilingual LCD Display**: Simple user interface for ease of operation.
- **Mode Buttons**: Auto (Automatic Start on Utility failure), Manual (Start with starter control, unit stays on. If utility fails, transfer to load takes place), Off (Stops unit. Power is removed. Control and charger still operate).
- **Ready to Run/Maintenance Messages**: Standard
- **Engine Run Hours Indication**: Standard
- **Programmable start delay between 2-1500 seconds**: Standard (programmable by dealer only)
- **Utility Voltage Loss/Return to Utility Adjustable**: From 140-171 V/190-216 V
- **Future Set Capable Exerciser/Exercise Set Error Warning**: Standard
- **Run/Alarm/Maintenance Logs**: 50 Events Each
- **Engine Start Sequence**: Cyclic cranking. Engine cranks a maximum of five times at factory set intervals and durations.
- **Starter Lock-out**: Starter cannot re-engage until 5 sec after engine has stopped.
- **Smart Battery Charger**: Standard
- **Charger Fault/Missing AC Warning**: Standard
- **Low Battery/Battery Problem Protection and Battery Condition Indication**: Standard
- **Automatic Voltage Regulation with Over and Under Voltage Protection**: Standard
- **Under-Frequency/Overload/Stepper Overcurrent Protection**: Standard
- **Safety Fused/Fuse Problem Protection**: Standard
- **Automatic Low Oil Pressure/High Oil Temperature Shutdown**: Standard
- **Overcrank/Overspeed (≤ 72 Hz)/rpm Sense Loss Shutdown**: Standard
- **High Engine Temperature Shutdown**: Standard
- **Internal Fault/Incorrect Wiring Protection**: Standard
- **Common External Fault Capability**: Standard
- **Field Upgradable Firmware**: Standard

**Note:** Ratings are taken from the front of the generator. Sound levels taken from other sides of the generator may be higher depending on installation parameters. Rating definitions - Standby: Applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. (All ratings in accordance with BS5514, ISO3046 and DIN6271). **Maximum wattage and current are subject to and limited by such factors as fuel Btu/megajoule content, ambient temperature, altitude, engine power and condition, etc. Maximum power decreases about 3.5 percent for each 1,000 feet (304.8 meters) above sea level, and also will decrease about 1 percent for each 6 °C (10 °F) above 16 °C (60 °F).**
