NOTES:

- 1** Requires standalone PVC Frame kit to hold the GenTent, specifications here but we encourage customers to build their own.
- 2** Treat like a square tube frame; GTU adapters must be screwed into panels at all 4 corners; will this be acceptable or cause damage to the generator?
- 3** My database says this is a square tube frame but pics show round tube frame online. Provided
- 4** Using muffler heat shield ready version in case muffler heat shield present; if not, then
- 5** Length or width (or both) beyond spec for the GenTent 20k.
- 6** Open top generator. Not supported at this time.
- 7** Can treat like square tube frame; need to check if the GTUs can be screwed into the frame members that are covered by plastic.
- 8** Requires stacking clear vinyl skirts to reach down to the bottom of the outlets.
